Top Ten Reasons to Partner with BatchMaster Software

BATCHMASTER®
ERP Software for Process / Batch Manufacturers

10 Allows you to 'do business your way' by meeting your unique business needs

BatchMaster Enterprise is designed and pre-configured for the process manufacturing industry including specialty industries such as Foods, Chemicals, Nutraceuticals, Pharmaceuticals, Cosmetics, Paints & Coatings, Bakeries, Beverages, Dressings & Sauces, and Seasonings & Additives and others. It speaks your language with formulations at the core of the solution. Off the shelf, BatchMaster Enterprise contains the essential and unique distinctions required by your industry.

9 Ensures compliance with the most stringent industry regulatory requirements

With BatchMaster Enterprise, your company will comply with your industry's regulatory mandates. Vital compliance requisites are met allowing you to fulfill obligations for FSMA, GFSI, GHS, SARA, and to organizations such as FDA, OSHA, EPA, ISO, DOT and other regulatory institutions. These necessary federal and state regulation requirements are easily met with the system's ability allowing unique material specifications, capturing electronic data, managing formula revisions, and providing full auditing of key business transactions and manufacturing records.

8 Delivers a complete ERP solution

BatchMaster Enterprise works together with either Sage 100 ERP, Sage 300 ERP or QuickBooks to provide a complete solution that captures all critical business information and provides visibility into your entire business. Together with your preferred financial solution, BatchMaster Enterprise is designed to complement functions while interfacing critical Information so that data is available for access and use company-wide. Select or remain on your company's chosen business solution and gain all the unique functions to suit your process manufacturing organization.

7 Ensures progression and performance as your business grows

Stay at the forefront of your industry by making a sound investment in a flexible solution that will adapt to your evolving business needs. BatchMaster Enterprise along with Microsoft SQL Server, can scale easily from 5 to hundreds of users without compromising system performance. Our flexible pricing lets you buy what's needed for today and then add capabilities and additional users as your business grows.

6 Extends best practices for manufacturing and accounting

Your business can rest assured knowing your investment of BatchMaster Enterprise with your preferred accounting solution offers best practices to support your manufacturing and financial goals and requirements. These time-tested solutions are industry standards with thousands of users worldwide. We recognize your need to retain your proven financial package and we work together with your accounting business partner to ensure your satisfaction.

and QuickBooks**

5 Offers flexibility to suit your ideal configuration

Whether your company is looking for a solution to address formula management (formulas, laboratory R& D, QC, Costing and Safety Data Sheets) or full Enterprise functions (including all production tasks with MPS, MRP, and Production Scheduling Workbench), BatchMaster Enterprise offers you three editions.   Product Management, Business Essentials, and Advanced Management will deliver precisely the best configuration to fit your company's needs, and updates to the next edition can always be done to suit your timing and requirements.

4 Connects your people and systems

Bring together employees and improve cooperation in manufacturing, compliance, formulation, financials, distribution and customer service by sharing files across all functions. Business Intelligence (powered by QlikView) delivers self-service BI consolidating relevant data into a single application empowering users with information to make better decisions.

3 Ensure success of implementation to realize ROI sooner

Let our experienced professional services implementation team along with our experienced independent business partners help you to reach your goals. Working together, we quickly setup core functionality and efficiently migrate data from legacy systems. Start-up time is reduced using tools and templates that can accelerate implementation. Our flexible deployment options including on premise, hosting and Cloud make it easier to maximize your IT budget and resources and realize your return on investment.

2 Demonstrates a strategic choice for your business

We are experts in process manufacturing and intend to be your strategic business partner. BatchMaster Software Inc. has been serving process manufacturers for over 30 years and offers the most complete solution available to process manufacturers. Our experience and history translates into a strong dedication to your business. You can be assured of our commitment to your company and to your industry.

1 Count on innovation both now and into the future

BatchMaster Enterprise delivers both rapid ROI and lower cost of ownership for releases that one's investment with continuous product support the changing needs of process manufacturers. BatchMaster provides a worldwide presence for support and continues its legacy of serving process manufacturing businesses like yours today and tomorrow.
