- Effectively meet regulatory requirements
- Accelerate new product development
- Quickly scale production
- Gain efficiencies across all business processes
- Make more informed business decisions, faster, across all departments
- Improve customer service levels to retain and gain customer base
- Strengthen bottom line with a single source ERP solution

Introduction

Pre-configured to meet specific industry requisites, BatchMaster ERP is designed for Nutraceutical Manufacturers. The entire solution is built upon the SAP Business One platform and provides enterprise-wide functions that match the industry's stringent requirements. The system streamlines product development, quality assurance, inventory, compliance, financials and more, helping you maintain your competitive edge.

Compliance

☑ Provides full auditing of Batch Manufacturing Records and Master Batch Records

☑ Complies with FDA and 21 CFR Part 11 regulations by capturing all batch data, sign-offs and processes electronically

☑ Supports Non-Conformance and CAPA activities

☑ Provides Deviation and Adverse Event Reporting

☑ Offers bi-directional lot traceability supporting fast recall reporting

☑ Supports full version control of formula specifications

☑ Manages customer complaints

Quality

☑ Establish libraries of Vendor Inspection Plans and Checklists for raw materials, WIP and finished goods, as well as equipment

☑ Mandates the execution of QC tasks during receiving and production

☑ Performs stability testing of stored inventory

☑ Generates customizable COA (Certificate of Analysis) reports

Product Development

- ☑ Leverages capsule, soft gel and tablet characteristics in developing formulas

- ☑ Dynamically recalculates formulas to meet Label Claims

- ☑ Embeds QC tests, labor costs and instructions, within formula and packaging specifications

- ☑ Leverages integrated USDA and Genesis databases to determine ingredient physical and nutritional characteristics

- ☑ Dynamically recalculates formulas using active ingredient potencies

- ☑ Tracks samples from Product Development Requests through batch production

- ☑ Calculates formula cost estimates during product development

- ☑ Executes multi-level approval workflows for formulas and packaging BOMs

Inventory

- ☑ Performs Warehouse Management functions including receiving, put-away, picking, shipping, physical counts & transfers via mobile devices

- ☑ Allocates inventory based upon expiration dates and shelf life, as well as LIFO, FIFO and FEFO

- ☑ View dual inventory units of measure simultaneously – weights or volume and units

- ☑ Supports allergen, organic, Kosher, Halal and other industry specific types

- ☑ Tracks inventory by item, warehouse, lot, status, location and license

Batch Manufacturing

- ☑ Supports Contract Manufacturing environments

- ☑ Supports both make to stock and make to order operations

- ☑ Links dependent batch jobs together

- ☑ Dynamically sizes and schedules batch jobs

- ☑ Assigns equipment and labor to batch jobs

- ☑ Reserves inventory for specific batch jobs

- ☑ Prioritizes the scheduling and execution of specific batch jobs

- ☑ Auto-generates lot numbers at receiving and within WIP

- ☑ Enables the reworking of intermediates and finished goods during production

- ☑ Forecasts batch production jobs and purchases orders based upon supply and demand

Financials

- ☑ Provides comprehensive accounting and financial functionality

- ☑ Accurately manages cash flow, tracks fixed assets, and controls budgets

- ☑ Processes reconciliations, bank statements, and payments by various methods

- ☑ Tracks the status, costs, and profitability of every customer quote, order and shipment

- ☑ Manages Contract Manufacturer financials

- ☑ Offers multi-currency, multi-language and multi-company
